

SharePartXXL Newsletter Web Part for Microsoft SharePoint

SharePartXXL International GmbH is a worldwide provider of applications and solutions that add additional features to Microsoft Windows SharePoint Services (WSS) and Microsoft Office SharePoint Server (MOSS) typically required in Internet-, extranet- and intranet projects. Web Parts are developed completely based on Microsoft .NET and Microsoft SharePoint technology.

Newsletters and subscriptions are typical requirements for web portals. Complete solutions, those are directly integrated into the portal framework and manage the typical workflow from subscription over validation and dispatch without the need of any additional tools or gateways, are especially efficient. With the SharePartXXL Newsletter Web Part for Microsoft SharePoint, a solution like this is available as add on for the free of charge Microsoft Windows SharePoint Services (WSS 3.0) and the Microsoft Office SharePoint Server 2007 (MOSS).

Push or Pull? Do both

The SharePartXXL Newsletter Web Part for Microsoft SharePoint is the first complete all-in-one newsletter management solution based on 100% Microsoft SharePoint technology.

Created	Category	Email	Event	Newsletter Type	Newsletter	Additional Information
10/4/2007 10:58 AM	Subscription	smith@company.com	Subscriber Subscribed	Product News	TEXT	
10/4/2007 10:58 AM	Subscription	smith@company.com	Subscriber Subscribed	Company News	TEXT	
10/4/2007 10:58 AM	Subscription	smith@company.com	Subscriber Registered			

More: www.SharePartXXL.com/products/newsletter

Perfect extension: The default SharePoint RSS feeds and list based workflow alerts are very helpful, but in some case you have to push your users directly.

Easy to use: WYSIWYG HTML editing, dynamic generation of subscription forms based on customizable subscriber list views, prefilled forms for AD users.

Simple management: Preview function and test dispatch of newsletters to marked subscribers. Sending and subscription logging.

Flexibility out-of-the-box: HTML and text-based Newsletters can be offered with subscription option. Different types of newsletters can be managed simultaneously with different templates, e.g. for several subject topics, target groups or multiple language variations.

Full personalization: Common placeholders and sample templates already included.

Simple customizing: Custom placeholders can be added simply using additional fields and views for subscriber and newsletter lists.

Secure subscription workflow: double-opt-in workflow procedures available

Multilanguage Support: User interface available in several languages, easy to localize.

Easy installation: The solution is installed as SharePoint feature, with activate / deactivate option.

Easy import and migration: Newsletters, subscribers and subscriptions are hosted in SharePoint lists: no external tools required.

Years of experience: The solution was developed with the experience of the contentXXL CMS Newsletter Module in mind, approved in lots of implementations. The contentXXL CMS was awarded with the Microsoft .NET Solutions Award in 2002.
